WEEK-1 (6 JAN - 11 JAN)

[CO1]

1. Write a program to store and print the roll no., name, age and marks of a student using structures.

2. Write a program to store the roll no. (starting from 1), name and age of 5 students and then print the details of the student with roll no. 2.

3. Write a program to add two distances in inch-feet using structure. The value of the distances is to be taken from the user.

4. Write a program to store and print the roll no., name, age, address and marks of 15 students using structure.

5. Enter the marks of 5 students in Chemistry, Mathematics and Physics (each out of 100) using a structure named Marks having elements roll no., name, chem_marks, maths_marks and phy_marks and then display the percentage of each student.

6. Write a program to input the roll no, name and marks of 10 students using structure and count the number of those students whose marks are >=60, whose marks are <60 but >=50, whose marks are <50 but >=40 and whose marks are <40.
